

## RoboThespian Safe Operation Sheet

Supervisors working in robot area must be familiar with this sheet!

⚠ Keep hands and fingers well away from any moving parts while the robot is switched on - it may move at any time without warning!

⚠ Never reach inside the body, head or legs when the robot is powered!

⚠ In the event of an air leak / burst air muscle switch off the air at the blue valve (see picture)!

Valve OFF position:

⚠ We recommend all supervisors make themselves familiar with the online documentation at <https://wiki.engineeredarts.co.uk/>
